## SPARKLING WINE

### CHARMAT METHOD

---

This method involves the wine undergoing a secondary fermentation in large, stainless steel tanks. The process of adding yeasts and sugars is the same, but with the process being carried out in large vessels, the wine retains a lot of its fruit forward characteristics.

### CHAMPENOISE METHOD

---

This method of sparkling production is completely carried out inside the bottle. The wine is made first and then placed in the bottle, where sugars and yeasts are directly added to initialize fermentation.

## ORANGE | SKIN CONTACT & MINIMAL INTERVENTION WINES

---

For those wanting to try something different, these are wines made by leaving the grape skins and seeds in contact with the juice, creating a deep orange hued finished product, often unfiltered.

On the palate, they're big, dry and textured...amazing with food.

## ROSÉ WINES

---

Rosé happens when the skins of red grapes touch wine for only a short time. Where some red wines ferment for weeks at a time on red grape skins, rosé wines are stained red for just a few hours.
